

Northern Michigan University (NMU) located in the Upper Peninsula of Michigan at Marquette, has been providing Real Estate Appraisal related courses since 1990. In August of 1993, a unique relationship between appraisers and NMU was formed when thirty-five appraisers founded the non-profit corporation, Michigan Association of Real Estate Appraisers (**MAREA**) with the intent of offering Real

Estate Appraisers of Michigan convenient, affordable, timely, high quality educational opportunities, and a professional information network. Under that original agreement, NMU continues to provide educational courses and MAREA administration, while MAREA provides NMU with guidance for development of courses and the selection of the most convenient locations and times.

NMU/MAREA appraisal classes include a full range of both residential and non-residential, state-approved, **licensure** classes. These classes meet the educational requirements at every level of licensure. Also offered is a wide-range of **Continuing Education** classes. These CE classes are also State approved, continually reviewed and updated to ensure inclusion of current appraisal issues and held at numerous locations throughout Michigan. All instructors are appraisers and MAREA members. Each instructor has an open-line policy to answer questions, listen to concerns, or to provide any guidance requested.

Both appraisal course registration and MAREA membership are administered through the Office of Continuing Education and Sponsored Programs. The relationship between MAREA and NMU has grown to the point where NMU is providing the educational needs for nearly 1000 appraisers a year. Membership in MAREA entitles an appraiser to substantial discounts on classes, timely informational updates, a voice in future classes and class sites, and the ability to network with other appraisers in the State.

MAREA membership is open to all Real Estate Appraisers doing business in the State of Michigan. In addition, MAREA membership is open to mortgage brokers, mortgage lenders, attorneys, assessors, etc.
