

# Geography Department Course Availability

## NEED ADDITIONAL COURSES TO:

- meet your major or minor requirements
  - serve as a course substitution in major or minor
  - expand your course curriculum
  - serve as general elective credits
- ?

Check out these courses for Summer & Fall 2009!

### SUMMER 2009:

~ GC 210 – Natural Disasters (Session I via web – Dr. Regis): Learn about the causes & chances for the impending earthquake in California, or flooding in the Midwest.

~ GC 295 – Global Positioning Systems (Session II – Inst. Cameron Fuess): Explore the principles and uses for GPS in an outdoor classroom! Go beyond the basics and get hands-on experience collecting field data. Learn navigation and the ability to define precise locations.

### FALL 2009 (view course schedule for specific days/times):

~ GC 260 – Rocks and Minerals (GC 255 pre-req.) - Inst. Shawn Carlson: Like to find things? Shawn knows the best spots for mineral collecting in the area; join him for a field-based course that's likely to be very rewarding.

~ GC 295 – Intro. to Sustainability - Dr. DeGoosh: Explore the challenges of sustainability, opportunities & limits of meeting challenges, and application of these concepts in your professional & personal life.

~ GC 337 – Computer Cartography (GC 335 pre-req.) - Dr. Legg: Learn the exciting blend of art and science in the highly sought after and marketable skill of map making to create a graphical means of communication.

~ GC 465 – Hydrology (GC 235 or MA 171 pre-req.) - Inst. Dan Wiitala: As a professional geologist & V.P. of North Jackson Company, this field based course will allow you to share Dan's experiences in hydrogeological assessments of wetlands, groundwater-surface watershed interaction, & legacy mining remediation projects.

Contact the Geography Department in 3001 New Science (227-2500) for additional questions regarding these courses or to obtain approval for a course substitution.
